Profile

Cybersecurity and embedded systems engineering student at ENSA Tetouan with hands-on experience in offensive security, network defense, and security compliance. Hack The Box Pro Hacker (65+ machines compromised), with skills in SIEM detection engineering, Active Directory and web application penetration testing, firewall deployment, ISO/IEC 27001, and DevOps. Seeking a PFE internship to contribute to real-world cybersecurity engineering challenges.

Education

National School of Applied Sciences of Tetouan (ENSA Tetouan) 2022 – Present
Engineering Degree in Cybersecurity & Embedded Systems

Al Imam Al Ghazali High School, Martil, Morocco 2022
Baccalaureate, Mathematical Sciences A

Professional Experience

Cybersecurity & ISO 27001 Intern *(Spain / August 2026 / Remote)* **Cybercrin**

- Developed a web platform to automate and streamline ISO/IEC 27001 security audit processes for organizations
- Analyzed and translated ISO/IEC 27001 requirements into functional application modules
- Contributed to the design and implementation of the platform architecture and automated audit logic
- Applied cybersecurity and compliance principles throughout the software development lifecycle

Network & Infrastructure Intern *(Morocco / June – August 2026 / On-site)* **One Way Morocco**

- Installed and assembled network cabinets and patch panels
- Crimped and tested RJ45 Ethernet cables according to network standards
- Installed and configured Layer 2 switches and Wi-Fi access points
- Configured and deployed a WatchGuard T25 firewall
- Assisted with network troubleshooting and infrastructure deployment

Professional Projects

SIEM Attack Detection Platform (Elastic Stack)

- Designed and implemented a security monitoring solution based on the Elastic Stack (Elasticsearch, Kibana, Filebeat) to collect, process, and visualize security event logs

Security Lab: Vulnerable Web Application (Django)

- Deployed and maintained an Ubuntu VM hosting a vulnerable Django application for exploitation exercises, including Gitea subdomain management

DevOps: CI/CD & Kubernetes

- Implemented a CI/CD pipeline with containerized deployment using Jenkins, Docker, Kubernetes, and Ansible

CryptoCore-128: AES-128 Hardware Security Engine in VHDL (FPGA)

- Developed an AES-128 cryptographic core in VHDL/Verilog and deployed it on FPGA hardware for real-time data encryption

Technical Skills

Programming & Web: Python, JavaScript, C, PHP, SQL, Django, HTML, CSS
Cybersecurity: Web Penetration Testing, Active Directory Penetration Testing, Vulnerability Assessment, OWASP Top 10, ISO/IEC 27001, ISO 27002, ISO 27005, EBIOS RM, Elastic Security (SIEM)
Networking & Security: TCP/IP, VLAN, DHCP, Switching, WatchGuard Firewall, Network Services
Security Tools: Burp Suite, Nmap, Metasploit, Hashcat, Gobuster, NetExec, ffuf, Wireshark
Systems & Infrastructure: Linux, Windows, Active Directory, Docker, Kubernetes, Jenkins, Ansible, Git
Embedded Systems: VHDL, FPGA, Arduino

Certifications

- AD-RTS: Active Directory Red Team Specialist – Cyberwarfare Labs (2025)
- Ethical Hacking – Cisco Networking Academy (2026)
- CRTA (in progress): Certified Red Team Analyst – Cyberwarfare Labs
- CPTS (in progress): Certified Penetration Testing Specialist – Hack The Box
